

Module Registration Information for Summer Term 2024

M.Sc. Biodiversity, Ecology and Evolution

The module registration for the M.Sc. Biodiversity, Ecology and Evolution takes place online via [TOOL](#).

You do not have to register for the individual courses online. This will be arranged on site in the first lecture.

Schedule for module registration:

Online registration: **04.03.2024, at noon – 11.03.2024, 08:00 am**
(all modules)

Confirmation of modules: **12.03.2024, 01:00 pm – 15.03.2024, 08:00 am**
(only electives)

Important information on programme and registration

Programme of Study

1st semester (winter): 2 compulsory modules + 1 elective module

2nd semester (summer): 3 elective modules

3rd semester (winter): 3 compulsory modules

4th semester (summer): Master thesis

Elective Modules

You select the elective modules and prioritise them. After the online registration has closed, places are allocated by us. At the beginning of the confirmation time frame, you can see in TOOL to what modules you were allocated (status = "allocated"). After that you need to **confirm the modules within the given time frame** (see above). To do this you change the status **from "allocated" to "confirmed"** and save your action by pressing **"update"**. Only after having confirmed the module you are registered for both module and exam.

Please be aware that we try our best to allocate the places according to your wishes and priorities but due to a limited capacity and higher demand it might not always be possible to meet every students desire.

If you need to change modules after the confirmation period has ended or if you have not been allocated according to your wishes, you can send an email to semesterplanung.lw@uni-leipzig.de before 30.04.2024 and we will try to find a solution. Please use your university e-mail-address and provide your student number.

ATTENTION:

Attending a module or class without registration and confirmation via TOOL does not entitle you to take the exam. **Please ensure that all elective modules have the status “confirmed” and all compulsory modules have the status “allocated”.**

Deregistration from modules

You can deregister from modules yourself online **in AlmaWeb** from **01.04 – 15.05.2024**.

After 15th May 2024 it is only possible to deregister from a module after a written request to the examination board and with their approval.

Contact

If you have any questions regarding module registration and allocation, please send an email to semesterplanung.lw@uni-leipzig.de.

Please use your student email address and always give your student number.

Overview of modules

2nd semester

Elective modules

11-BIO-205 Interactions in Aquatic and Terrestrial Ecosystems

11-BIO-206 Macroecology and Macroevolution under Global Change

11-BIO-207 Biodiversity and Evolution of Vertebrates

11-BIO-208 Biogeography and Tropical Botany

11-BIO-209 Biodiversity and Ecosystem Functioning

11-BIO-210 Mycorrhiza, Symbiotic Associations, and Stress Adaptation

31-BIO-221 Essentials of Conservation Biology and Ecological Modelling

Need to be confirmed
