

Module Registration Information for Summer Term 2025 M. Sc. Neuroscience and Behavioural Biology (NBB)

The module registration for the M.Sc. Neuroscience and Behavioural Biology takes place online via <u>TOOL</u>. Instructions for using TOOL in German can be found <u>here</u> and in English <u>here</u>. Registration is only possible if you have re-registered for the summer semester by paying the semester fee on time.

Schedule for module registration:

Online registration:	10 th March, noon – 17 th March, 08:00 am
(all modules)	

Confirmation of modules:	18 th March, 1:00 pm – 20 th March, noon
(only electives)	

You do not have to register for the individual courses online. This will be arranged on site in the first lecture.

If you need to change modules after the confirmation period has ended or if you have not been allocated according to your wishes, you can send an email to <u>semesterplanung.lw@uni-leipzig.de</u> before 30th April 2025 and we will try to find a solution. Please use your university e-mail-address and provide your student number.

ATTENTION:

Attending a module or class without registration and confirmation via TOOL does not entitle you to take the exam. Please ensure that all elective modules have the status "confirmed" and all compulsory modules have the status "allocated".

Deregistration from modules

You can deregister from modules yourself online <u>in AlmaWeb</u> from 24th March 2025 – 15th Mai 2025.

After 15th Mai 2025 it is only possible to deregister from a module after a written request to the examination board and with their approval. <u>Here</u> you can find more information's.

<u>Contact</u>

If you have any questions regarding module registration and allocation, please send an email to <u>semesterplanung.lw@uni-leipzig.de</u>.

Please use your student mail address and always give your student number.

Further information (module registration, deregistration, deadlines, course catalogue) you can find here.

Important information on program and registration

In the first academic year, you take **six compulsory elective modules** (60 credit points). **Five** of these modules need to belong to the **Neuroscience and Behavioral Biology (NBB)** study program.

The final **10 credit points** can be filled with modules from the Neuroscience and Behavioral Biology study program or the modules offered in cooperative study programs. You register in these modules via TOOL.

Elective Modules (1st and 2nd semester)

You select the elective modules and prioritise them. After the online registration has closed, places are allocated by us. At the beginning of the confirmation time frame, you can see in TOOL to what modules you were allocated (status = "allocated"). After that you need to **confirm the modules within the given time frame** (see above). To do this you change the status **from** "**allocated**" to "**confirmed**" and save your action by pressing "**update**". Only after having confirmed the module you are registered for both module and exam.

Please be aware that we try our best to allocate the places according to your wishes and priorities but due to a limited capacity and higher demand it might not always be possible to meet every students desire.

Compulsory Modules (3rd semester)

You select the compulsory module, save your action and you are allocated to the module immediately. The status in TOOL will be changed into "allocated". You are registered both for module and exam. A confirmation of your place is not necessary.

Programme of Study

1st semester (winter): 3 elective modules

2nd semester (summer): 3 elective modules

3rd semester (winter): 3 compulsory modules

4th semester (summer): Master thesis

Overview of modules

2nd semester

Elective Modules

- 09-BIO-225 Clinical and Translational Neuroscience
- 11-BIO-213 Brain Mechanisms of Perception and Cognition
- 11-BIO-214 Behavioral Neurogenetics
- 11-BIO-222 Neuroimaging
- 11-BIO-223 Diversity of Cognition
- 11-BIO-226 Molecular Anthropology

Must be confirmed and saved during the confirmation period

Modules offered in cooperative study programs:

07-201-2508 Gründungsmanagement (Zusatzmodul)

09-BIO-0808 Biophysikalische Methoden in Medizin und Biologie

09-BIO-0825 Molekulare Medizin, Virologie^{*}fits well with the content of the elective modules. Language is German! From summer term 2026 in English!

10-202-2208 Bioinformatik von RNA- und Proteinstrukturen

11-BCH-0801 Rezeptorbiochemie und Signaltransduktion

11-BCH-0813 Molekulargenetik

- 11-BIO-205 Interactions in Aquatic and Terrestrial Ecosystems
- 11-BIO-206 Macroecology and Macroevolution under Global Change* Change in content: The topic

'Macroevolution' is no longer covered!

11-BIO-207 Biodiversity and Evolution of Vertebrates

11-BIO-208 Biogeography and Tropical Botany

11-BIO-209 Biodiversity and Ecosystem Functioning

11-BIO-210 Mycorrhiza, Symbiotic Associations, and Stress Adaptation

31-BIO-221 Essentials of Conservation Biology and Ecological Modelling

Must be confirmed and saved during the confirmation period in TOOL

Please check whether the language of instruction is English.
