

Module Registration Information for Winter Term 2024/25 M. Sc. Biodiversity, Ecology and Evolution (BEE)

The module registration for the M.Sc. Biodiversity, Ecology and Evolution takes place online via [TOOL](#). Instructions for using TOOL in German can be found [here](#) and in English [here](#). Registration is only possible if you have re-registered for the winter semester by paying the semester fee on time.

Schedule for module registration:

Online registration: **30th September, noon – 07th October, 11:59 pm**
(all modules)

Confirmation of modules: **08th October, 2:00 pm – 09th October, 11:59 pm**
(only electives)

You do not have to register for the individual courses online. This will be arranged on site in the first lecture.

If you need to change modules after the confirmation period has ended or if you have not been allocated according to your wishes, you can send an email to semesterplanung.lw@uni-leipzig.de before 25th October 2024 and we will try to find a solution. Please use your university e-mail-address and provide your student number.

ATTENTION:

Attending a module or class without registration and confirmation via TOOL does not entitle you to take the exam. **Please ensure that all elective modules have the status “confirmed” and all compulsory modules have the status “allocated”.**

Deregistration from modules

You can deregister from modules yourself online **in AlmaWeb** from **07th October 2024 – 15th November 2024**.

After 15th November 2024 it is only possible to deregister from a module after a written request to the examination board and with their approval. [Here](#) you can find more information's.

Contact

If you have any questions regarding module registration and allocation, please send an email to semesterplanung.lw@uni-leipzig.de.

Please use your student mail address and always give your student number.

Further information (module registration, deregistration, deadlines, course catalogue)

you can find [here](#).

Important information on program and registration

Compulsory Modules

You select the compulsory module, save your action and you are allocated to the module immediately. The status in TOOL will be changed into “allocated”. You are registered both for module and exam. A confirmation of your place is not necessary.

Elective Modules

You select the elective modules and prioritise them. After the online registration has closed, places are allocated by us. At the beginning of the confirmation time frame, you can see in TOOL to what modules you were allocated (status = “allocated”). After that you need to confirm the modules within the given time frame (see above). To do this you change the status from “allocated” to “confirmed” and save your action by pressing “update”. Only after having confirmed the module you are registered for both module and exam.

Please be aware that we try our best to allocate the places according to your wishes and priorities but due to a limited capacity and higher demand it might not always be possible to meet every students desire.

Programme of Study

1st semester (winter): 2 compulsory modules + 1 elective module

2nd semester (summer): 3 elective modules

3rd semester (winter): 3 compulsory modules

4th semester (summer): Master thesis

Overview of modules

1st semester

Compulsory Modules

11-BIO-201 Quantitative Methods in Biodiversity Sciences

11-BIO-202 Molecular Evolution

Elective Modules

11-BIO-0710 Soil Ecology ATTENTION: We expect to clarify if this module can be offered at the beginning of September.

11-BIO-203 Molecular Ecophysiology and Biotechnology of Plants

11-BIO-204 Structure, Function and Ecology of Microbial Communities

need to be confirmed

3rd semester

Compulsory Modules

11-BIO-218 Internship (Praxistutorium)

11-BIO-219 Theoreticum

11-BIO-220 Practical Laboratory Course (Laborpraktikum)
